

## CHALLENGES

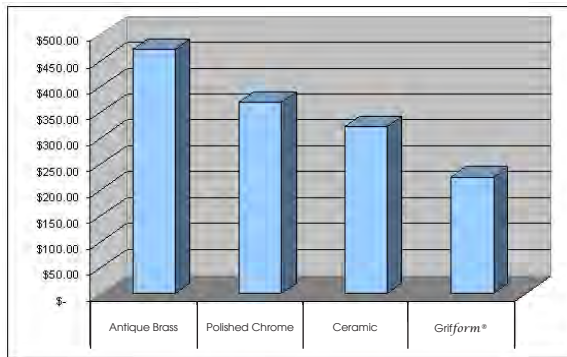

- Finding a faucet stem that eliminates seams where microorganisms can survive and multiply.
- Identifying a faucet stem that is seamlessly mounted to a solid surface countertop and will compliment or match DuPont™ Corian®.
- Choosing a faucet stem that is easily installed, repaired and maintained.
- Selecting a faucet stem that can be mounted in any location - not just those designed and specified by the sink manufacturer.
- Maintaining design consistency with focus on warm and inviting facilities and surroundings.

## SOLUTION

- The Grifform Innovations® Faucet Stem is available in 8 pleasing colors meets all the challenges you face.

## RESULTS

- A seamless faucet stem made of a nonporous material to eliminate opportunities for microorganisms to survive.
- A faucet stem that is mounted directly into the countertop and in any location you require.
- A beautiful, solid and durable faucet stem that enables you to match or complement the décor or existing fixtures.
- An easy-care, durable fixture that's simple to install and maintain.
- A product that meets and exceeds the stringent ASME Standards.

## ATTRIBUTED VALUE OF THE GRIFform® FAUCET STEM

- Works with most water flow controls
- Lower maintenance cost
- Easy installation
- Extended life cycle
- Seamless connection mount
